

# YASH SARAF

Associate Software Engineer | JavaScript | Python | Node.js | React.js | Full Stack | MCA Graduate

Pune, India | +91 9577526060 | yashsaraf2312@gmail.com | linkedin.com/in/yash-saraf-5885791a6 | github.com/heisenberg07-master

## PROFESSIONAL SUMMARY

MCA graduate with foundational software engineering skills in JavaScript, Python, SQL, Node.js, and React.js. Experienced in developing full-stack applications, writing automated unit and API tests, performing code reviews, and troubleshooting software defects to root cause. Applies established coding standards, Agile/Scrum methodologies, and documentation practices to deliver quality software. Familiar with NoSQL and SQL databases, REST APIs, Git-based version control, Docker, and cloud platforms (GCP). Strong desire to learn, build technical mastery, and contribute as a reliable individual contributor within a continuous improvement culture.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript (familiar), Python, SQL, C, HTML5, CSS3/SASS (familiar)

**Frameworks & Libraries:** React.js, Node.js, Express.js, REST APIs — familiar with Angular, RXJS concepts

**Testing & Quality:** Unit Testing, API Testing, End-to-End Testing — familiar with Jest, Postman/Newman, TDD approach

**Databases:** MongoDB (NoSQL), SQL, PostgreSQL (familiar), database schema design, query optimisation

**DevOps & Infrastructure:** Git, GitHub, Docker (familiar), NPM, Yarn, Jupyter Notebook, GCP — familiar with AWS, Jenkins, Terraform

**Methodologies:** Agile, Scrum, Kanban, DevSecOps (familiar), Code Reviews, Technical Documentation, SDLC

**Additional:** Microsoft Office (Word, Excel, Outlook), Strong problem-solving, Attention to detail, Written & verbal communication

## PROFESSIONAL EXPERIENCE

### DevTown

Bengaluru, India

*Business Development Executive*

October 2024 – January 2025

- Collaborated and communicated effectively with cross-functional teams and stakeholders across the organisation, contributing to a 15% customer base increase and 20% revenue growth.
- Managed a variety of concurrent tasks in a fast-paced environment, demonstrating adaptability, deadline management, and strong verbal and written communication skills throughout.
- Documented business processes, tracked issues to successful resolution, and participated actively in team meetings — reflecting a high level of professionalism and customer service orientation.

### CipherByte Technologies

Remote

*Python Developer Intern*

July 2024 – September 2024

- Developed software applications using established coding standards; wrote unit and API tests achieving ~95% test reliability — applying a test-first approach to ensure quality and defect prevention.
- Troubleshoot, instrumented, and debugged existing software, resolving root causes of defective behaviour and improving runtime performance by ~25%.
- Performed thorough code reviews promoting better team understanding; documented software changes clearly for use by engineers and quality assurance, improving project efficiency by ~10%.

## PROJECTS

### Lumina Events Booking Web Application

February 2026 – March 2026

*Stack: JavaScript, React.js (Hooks), Node.js, Express.js, MongoDB, REST APIs, GCP, Git, Docker (familiar)*

*Methodology: Agile/Scrum, TDD, Unit Testing, API Testing, Code Reviews, Infrastructure as Code concepts*

- Developed software application and supporting infrastructure using established coding standards; created proof of concept for AI-driven event recommendations to validate feasibility and viability.
- Built intuitive React.js UI with end-user persona in mind; developed scalable, secure Node.js backend services with REST APIs and optimised MongoDB schema for high-performance data retrieval.
- Relentlessly pursued quality through unit, API, and end-to-end testing; performed code reviews, documented changes, and deployed on GCP applying cloud-managed services and Git workflows.

### URL Shortener Web Application

December 2025 – January 2026

*Stack: JavaScript, Node.js, Express.js, MongoDB (NoSQL), REST APIs, Git | Unit Testing, Performance Optimisation*

- Developed scalable backend services using Node.js and Express with optimised NoSQL data storage; applied database design principles for reliable high-frequency redirection at scale.
- Tracked software issues to successful resolution through systematic debugging; documented changes clearly and maintained Git version control with structured branching throughout.

## EDUCATION

### Tilak Maharashtra Vidyapeeth

Pune, India

*Master of Computer Applications (MCA) — Computer Science*

August 2023 – July 2025

GPA: 5.82/10

### Sandip University

Nashik, India

*BSc Computer Science*

August 2020 – July 2023

GPA: 7.67/10
